PROFESSIONAL SUMMARY

Full Stack Developer with 4 year of expertise in TypeScript, React and Node.js. Highly adept at solving complex logical challenges and integrating advanced AI/API functionalities. Experienced in both backend-heavy and full-stack roles within product and service based organizations. Combines strong algorithmic logic with professional communication to bridge the gap between technical execution and business goals.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, React.js, Node.js, Express.js
- **Databases:** MongoDB, SQL, Firebase
- **Tools & Integrations:** Git, REST APIs, OpenAI API
- **Core Competencies:** API design and integration, Agile software development, Scalable Database Management(SQL/NoSQL), Technical leadership & Communication.

UNITASK SOLUTIONS Pvt. Ltd. | Hybrid

Full Stack Developer | Oct, 2023 – Present

Receipt verification Platform (Gocxm)

- Architected an AI-driven Receipt Verification System utilizing Google cloud vision OCR and OpenAI APIs to automate data extraction, reducing manual entry time by 60%.
- Optimized system latency by implementing Redis Caching, which decreased database load and improved response times for high-frequency verification requests.
- Refactored legacy codebase to improve modularity and readability, resulting in a cleaner architecture that accelerated future feature deployment.
- Delivered critical functionalities within strict sprint deadlines under Agile methodology, consistently ensuring 100% on-time delivery of complex backend modules.

LaNet Software Solutions Pvt. Ltd | On-Site

Full Stack Developer | Jan, 2022 – Oct, 2023

Customer Relationship Management system

- Engineered core CRM modules including Contacts, Conversations, Deals and Tasks, managing complex relational data.
- Developed scalable backend services using Node.js, leveraging TypeScript for enhanced type safety.
- Architected dynamic frontend interfaces in React.js, implementing Redux for centralized state management to handle real-time updates.
- Optimized team productivity by adhering to Agile/Scrum methodologies, utilizing Jira for sprint planning and GitHub for robust version control and peer code reviews.

PROJECTS

1. Receipt Verification Portal (Gocxm)

Technology: Node.js with SQL.

2. Ranktivity (Unitask Technologies)

Technology: NextJS

Design Frameworks: react-bootstrap

3. CRM One (Lanet)

Technology: ReactJS, Node.js with MongoDB, firebase

Design Frameworks: Material ui, Tailwind CSS, react-bootstrap

EDUCATION

Veer Narmad South Gujarat University | Surat, Gujarat

Masters in Computer Applications (MCA) | May, 2022 (CGPA: 8.35)

Shri Ram Krishna Institute of Computer Education and Applied Sciences | Surat, Gujarat

Bachelor of Science in Computer Science (BSc CS) | May, 2019 (CGPA: 8.5)
